

MBTLighting.com Upgrade Project

11.16.10

Overview

Colophon recently completed a very successful upgrade for another site for this same company (SierraGuitars.net). There may be some features/modules that can be used in this upgrade.

Current/Legacy Site

www.mbtlighting.com

CF9 Site

Development Area for Upgrade (coded by Zybianz's Akbar)

<http://www.mbtlighting.com/2010/xhtmlltemplates/index.html>

(Menu items not linked)

I have updated the main menu and footer to use CF includes.

Tasks

1. Install Site Manager 3.0
2. Migrate Data From Legacy Site
3. Akbar has included PHP commenting (`<?php /* closing footer section */ ?>`). Please update this to CF `<!-- closing footer -->`
4. Install `<cfincludes>` for all repetitive areas.
5. Create Layout Files "MainLayoutSupport.cfm" etc. for areas that use repetitive design.
6. Update menu include to identify page to show "current page state" in menu.

Pages & Features

Header Area - all templates (create as an include)

1. Link logo to index.cfm
2. Add script to clear text from form "Search This Site" when onFocus. As can be seen on our company site: <http://www.cnmwebsite.com>

Footer Area - all templates (create as an include)

All Templates

All page will requires some controls.

1. Ability to edit content in main content area / grey area with white text
2. Ability to update the side column image.
as in: http://www.mbtlighting.com/2010/img/pink_side_bar_about.gif
3. Be able to update the large background images for each page. W1200
4. The following items for each page will be controlled in Admin
 - a. Page <title>
 - b. Page <HEADING> <h1> Akbar currently has this as <h2> (<h2>Products</h2>) should be changed to <h1>
 - c. META Description
 - d. META Keywords

Home Page

<http://www.mbtlighting.com/2010/index.cfm>

1. Large white area: Same feature/module as seen on home page of:<http://www.sierraguitars.net/>
2. Twitter Area.
<http://twitter.com/mbtlighting>
Use most recent Tweet Record to display in this area.
3. 2 areas of 460 x 120. **These should actually be 470 x 120.**
 - a. Admin needs controls to allow control of these images with related URL.
 - b. Control should also allow to toggle to 1 images of 940 x 120 with related URL

Products

This is the most complex part of the system with most features.

1. Main landing page for Products displays the "Categories"
Legacy version:

<http://www.mbtlighting.com/Categories.cfm?CFID=64986743&CFTOKEN=81792961>

- a. Controls to update the category images

New version has select with Select forms with the Sub Categories, as in this legacy page: <http://www.mbtlighting.com/SubCategories.cfm?CategoryID=63>.

User then lands on list of products with Thumbnails, as in legacy page:
<http://www.mbtlighting.com/Products.cfm?SubCategoryID=209&CFID=64986743&CFTOKEN=81792961>

2. User then clicks individual product and gets details page as with new design:
<http://www.mbtlighting.com/2010/products-details.cfm>
3. Each product will require multiple pieces of content.
 - a. Images
 - i. Main Image
 1. Thumbnail
 2. Medium
 3. Large
 - ii. Additional Images
 1. Medium
 2. Large
 - b. Description Field (displays to the right of medium image)
 - c. Icons at bottom of Description
 - i. Video (youTube Embed Code)
 - ii. Bookmark
 - iii. ?
 - iv. Product Reference Manual (PDF)
 - v. Product Specifications (PDF)
4. The product image area (medium image) allows
 - a. Navigate to next image or back (if exists images)
 - b. Enlarge to (large image) - grey out main screen and show only image with close button. Within this large view all navigation of images.
 - c. Zoom - like with Sierra products.
5. Each Product will show related products in the color band below product. These should be products in the same category.

News

<http://www.mbtlighting.com/2010/news.cfm>

Same Module as:

<http://www.sierraguitars.net/news.cfm>

Videos

Videos will allow youTube Embed Code.

(These features exist in SierraGuitars.net)

Videos will be have

1. Categories
 - a. Demos (videos-demos.cfm)
 - b. Tutorials (videos-tutorials.cfm)
 - c. Archives (videos-archives.cfm)
2. Ability to Embed youTube code

Dealers

<http://www.mbtlighting.com/2010/dealers.cfm>

Migrate data to allow search using fields show.

If required, create flags for "International" and "Online"

Support Area
